Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

1. The indicated allowability of claims 1-5 and 11-16 are withdrawn in view of the newly discovered reference(s) to Gaiani et al (US Patent 5,539,728). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 11-14, and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Gaiani et al (US Patent 5,539,728).

Regarding to claims 1-4, Gaiani discloses a system for allocating a power budget between at least two different communication channels, one of which comprises a voice channel and the other one of which comprises a data channel (fig. 1 col. 3 lines 41-47), comprising at least two receiving-stations M_1 - M_N , which between them are configured to receive all of the at least two different communication channels (col. 3 lines 41-47); and, a transmitting-station BS for transmitting each of the channels to at least one of the receiving-stations using a portion of the power budget (col. 3 lines 41-47), the portions being allocated by said transmitting-station such that the power budget is substantially consumed (col. 3 lines 60-62), wherein said transmitting-station is configured such that the allocation of power to the voice channel for a subsequent time period (every cycle)

Art Unit: 2616

is based on the actual power consumed by the voice channel for a known time period (preceding interval), and wherein the known time period comprises a current time period (current cycle) and the subsequent time period immediately follows the current time period (col. 4 lines 14-20); and wherein each of the time periods is from about one millisecond to about forty millisecond (col. 4 lines 5-11).

Regarding to claims 11-14, Gaiani discloses the each time period is about ten milliseconds to a hundred milliseconds (col. 4 lines 5-11).

Regarding to claim 16, Gaiani discloses the remainder of the power budget that is not allocated to the voice channel is allocated by said transmitting station to another communication channel (col. 6 lines 23-40).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gaiani.

Regarding to claim 5, Gaiani discloses all the limitations with respect to claim 1, except for the transmitting station is a subscriber station and the receiving station is base station. However, to arrange such station for receiving and transmitting would have been obvious to a person of ordinary skill in the art, at the time of the invention, since arrangement is well known in the art.

Allowable Subject Matter

6. Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claim 16 is allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or make obvious the steps of or means **“for the future time period, allocating a remaining amount of power to a remainder of the channels, the remaining amount being an amount that was unallocated to the at least one voice channel”**, when such allocation is considered within the specific combination of steps recited in the method of claim 16.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc T. Duong whose telephone number is 571-272-3122. The examiner can normally be reached on M-F (9:00 AM-6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wing Chan can be reached on 571-272-7493. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
